ABSTRACT

The Federal Government provides support for education well beyond programs funded through the Department of Education. Federal support for education, excluding revenues foregone through allowable income tax deductions, was an estimated $87.5 billion in fiscal year (FY) 1993, an increase of $24.1 billion (38%) since FY 1990, representing, after adjustment for inflation, a 25% increase. This publication provides data on federal support and trends in recent years. On-budget federal funds for educational programs in FY 1993 were estimated at $68.4 billion, an increase of 33% since FY 1990 in current dollars (20% after adjustment for inflation). Nonfederal funds generated by federal programs (predominantly postsecondary education loans) were estimated at $19.0 billion, a rise of 62% in current dollars from 1990 to 1993. The period marked an increase in on-budget program funds for elementary and secondary education of 12%, with a decrease of 13% in funds for postsecondary education, and a 58% increase in other education funds. It is noted that elementary and secondary schools and colleges derive only about 11% of their revenues from the Federal Government. Three figures and nine tables provide detailed information about expenditures, with an additional six detailed tables in six appendices. (SLD)

Federal Support for Education: Fiscal Years 1980 to 1993 Highlights

The federal government provides support for education well beyond programs funded through the Department of Education (ED). Federal support for education, which excludes estimated federal tax expenditures,[1] was an estimated $87.5 billion in fiscal year (FY) 1993, an increase of $24.1 billion, or 38 percent, since FY 1990. After adjustment for inflation, federal support for education increased 25 percent between FY 90 and FY 93 (see tables 1A and 1B, page 6).

- For FY 93, on-budget federal funds for education programs were estimated to be $68.4 billion—an increase of 33 percent since FY 90 in current dollars or an increase of 20 percent after adjusting for inflation. Nonfederal funds generated by federal programs (predominantly postsecondary education loans) were estimated at $19.0 billion, a rise of 62 percent in current dollars between FY 90 and FY 93 and 46 percent in constant dollars (see tables 1A and 1B, page 6).

- Between FY 80 and FY 93, after adjusting for inflation, federal on-budget program funds for elementary and secondary education increased 12 percent; postsecondary education funds declined 13 percent; other education funds (which include funds for libraries, museums, cultural activities, and miscellaneous research) increased 58 percent; and funds for research at universities and university-administered research and development centers increased 53 percent (see table 2B on page 8).

- Between FY 90 and FY 93, funds for elementary and secondary education rose by 29 percent in constant dollars, postsecondary funds rose by 13 percent, other education funds rose by 15 percent, and research rose by 12 percent (see table 2B on page 8).

- In FY 93, ED outlays totaled $30.7 billion, reflecting an increase of 33 percent after adjustment for inflation from FY 80 and a 19 percent increase between FY 90 to FY 93. ED's share of total federal on-budget education funds rose from 38 percent in FY 80 to 45 percent in FYs 90 and 93 (see figure 1, page 3 and table 3, page 9).

- Over 58 percent of federal education support, which excludes estimated federal tax expenditures, went to educational institutions in FY 93. Another 18 percent was used for student support. The remaining 24 percent went to banks and other lending agencies, libraries, museums, and federal institutions (see tables 7A and 7B, pages 16 and 17).

- Elementary and secondary schools and colleges derive only about 11 percent (FY 93) of their revenues from the federal government, with the remaining revenues coming from state and local governments, individuals, and private organizations. Of the estimated $466 billion in direct expenditures by schools and colleges in FY 93, revenues from federal sources amounted to $51 billion and revenues from other sources amounted to $415 billion (see tables 9A and 9B, pages 21 and 22).

- The estimated federal share of expenditures of educational institutions declined from 14 percent in FY 80 to 10 percent in FY 90, but rose to 11 percent in FY 93. Among elementary and secondary educational institutions, the federal share declined from 12 percent in FY 80 to under 8 percent in FY 90, but rose to over 8 percent in FY 93, and at institutions of higher education, the federal share declined from 18 percent in FY 80 to 14 percent in FY 90, but rose to 15 percent in FY 93 (see tables 9A and 9B, pages 21–22, and the Sources and Methodology section, pages 23 and 24).

[1] Definitions of federal tax expenditures and other technical terms are in the Definitions section of this report on page 25.

NOTE: These data are different from those published in the report of the National Education Goals Panel. See Sources and Methodology, pages 23 and 24, for explanation.

- In FYs 80, 90, and 93, federal support was distributed across levels and other educational purposes as follows (see figure 2, page 5, tables 1A and 1B, page 6, tables 2A and 2B, pages 7–8, and table A in appendix, page 29):

	FY1980	FY1990	FY1993[1]
	[In billions of **current** dollars]		
On-budget	$34.5	$51.6	$68.4
Elementary and secondary	16.0	22.0	31.5
Postsecondary (on-budget)	11.1	13.7	17.0
Libraries, museums, and other	1.5	3.4	4.3
Research	5.8	12.6	15.6
Nonfederal[2]	4.9	11.7	19.0

Introduction

The U.S. Department of Education was created in May 1980. Most of the programs in the Department of Education were formerly in the Office of Education in the U.S. Department of Health, Education, and Welfare. This report attempts to provide a comprehensive picture of total federal financial support for education since fiscal year 1980.[4] The appendix tables in the back of this report have additional historical data for fiscal years 1965, 1970, and 1975. In order to account fully for all federal support for education, programs having significant educational components are included, even if they have additional purposes (see tables A and C, pages 29 and 31 in appendix).

Assembling data on federal funds for education is difficult for a number of reasons. First, federal education programs are found in dozens of federal departments and agencies. Although some consolidation of education programs in one federal agency was achieved with the establishment of the U.S. Department of Education in 1980, many large and significant federal education programs remain outside the Department. In order to provide a more complete account of federal support for education, the education support from other federal agencies has been included.

A second complicating factor is that many federal programs involving education have other primary purposes. For example, education-related programs range from cultural activities conducted in this country and abroad to some major training institutions, such as the Foreign Service Institute and the FBI Academy. Also, a variety of concerns—ranging from poverty in programs like Head Start to veteran's assistance—are addressed, in part, through federal education programs (see table C, page 31 in appendix).

Third, nonfederal funds generated by federal legislation are sometimes overlooked or misunderstood, but contribute a significant share of total support for education (see pages 12–13).

The fourth factor is estimated federal tax expenditures related to education, which in this report include only reductions in tax revenue received by the federal government due to deductions, exemptions, and credits allowable in the tax code. Education programs can be supported either by direct funding or by indirect funding mechanisms such as tax expenditures (see page 14).

[4] Some data have been revised from *Federal Support for Education: Fiscal Years 1980 to 1992* and *Digest of Education Statistics, 1992*.

It is also important to note that FY 93 data are mostly estimated and may be subject to later revision. These estimates of FY 93 outlays are provided by various federal agencies and the U.S. Office of Management and Budget, *Budget of the United States Government, Fiscal Year 1994*.

To the extent possible, outlays were used in this report rather than obligations, with the exception of funds for academic research at institutions of higher education. *Outlays* are the actual amount of dollars spent. *Obligations* are spending commitments by the federal government that will require outlays either immediately or in the future.[5]

This report has put federal education funding into two categories: on-budget support and nonfederal funds generated by federal programs. Some analysts also consider funding provided through federal tax expenditures as potential education funding. Unless otherwise noted, these tax expenditures are excluded from tables in this publication (see table A, page 29 in appendix).

1. On-budget funding for federal programs is generally set through Congressional appropriations.

2. Nonfederal funds are generated by federal programs that provide loan guarantees and interest subsidies to support loan capital raised through various private and public sources. The nonfederal funds are not recorded in the federal budget, but contingent federal financial responsibility exists for most of these funds in the form of federal guarantees and subsidies for student loans made by banks and other lending institutions. Nonfederal funds are also made available for education purposes when federal programs require matching funds or offer incentives and subsidies. Almost all such nonfederal education funds go to postsecondary education.

3. Federal tax expenditures are revenue deductions attributable to provisions of the federal tax laws that allow a special exclusion, exemption, or deduction from gross income or that provide a special credit, a preferential rate of tax, or a deferral of tax liability. An example would be charitable contributions to educational institutions.

This report shows current and constant dollar comparisons, based on the federal funds composite deflator from the U.S. Office of Management and Budget, *Budget of the United States Government, Fiscal Year 1994*. The inflation index rose 76.0 percent between FY 80 and FY 93. Additional technical information appears in the Sources and Methodology section, pages 23 and 24.

[5] A more detailed description is in the Definitions section, page 25.

The National Center for Education Statistics (NCES) plans to continue publishing an annual report on federal funds for education. Other reports on federal funds for education that have been published through the U.S. Department of Education are *Estimating Federal Funds for Education: A New Approach Applied to Fiscal Year 1980* (Office of Planning, Budget, and Evaluation); *Federal Support for Education*, various years (NCES); and *Digest of Education Statistics*, Chapter IV, various years (NCES), and the National Goals Panel report.

This report has received extensive reviews by individuals within and outside the Department of Education. The author gratefully acknowledges their time and expert advice. Within the Office of Educational Research and Improvement (OERI), Thomas D. Snyder, Mary J. Frase, W. Vance Grant, and Peter S. Stowe reviewed the manuscript. Gerald Devlin provided editorial assistance and Phil Carr designed the cover. Also within the Department of Education, Office of the Undersecretary, Kirk Siegwarth reviewed the manuscript. Outside reviewers were Jay Noell from the Congressional Budget Office, and Dan Tangherlini from the Office of Management and Budget.

Federal Support for Education

Growth of Federal On-Budget and Nonfederal Funds: 1965 through 1993

Federal support for education is estimated to be $87.5 billion in fiscal year (FY) 93, an increase of 122 percent since FY 80. After adjustment for inflation, the increase amounts to 26 percent. Federal education support includes federal program funds and nonfederal funds generated by federal programs but excludes estimated federal tax expenditures. (See tables 1A, 1B, and table A in appendix.)

Even after adjusting for inflation, federal on-budget program funding for education rose dramatically between FY 65 and FY 75, reflecting an increase of 204 percent for elementary and secondary education; 256 percent for postsecondary education; 139 percent for other education; and almost 5 percent for research at educational institutions (see figure 2 and table A in appendix). Nonfederal funds generated by federal programs grew from virtually nothing in FY 65 to $3.7 billion in 1993 dollars in FY 75.

Between FY 75 and FY 80, funding for most programs remained relatively stable, except for "other" education, which dropped 35 percent, and nonfederal funding for student loans, which grew rapidly. Because of the expansion of the student loans—in part through the Middle Income Student Assistance Act of 1978, which made all students eligible for subsidies regardless of need—nonfederal funds generated by federal programs rose from $3.7 billion in FY 75 to $8.5 billion in FY 80 (constant 1993 dollars).

After declining in the early 1980s, federal on-budget funds for education began to rise slightly in constant dollars, reflecting increases in support for elementary and secondary education, "other" education, and research at colleges and universities. However, postsecondary education did not show any increase until fiscal year 1989. The main reason for this decline was due to the termination of two programs: the old GI Bill and the Social Security postsecondary benefits programs (see page 7).

Between 1980 and 1983, total federal on-budget and nonfederal funds for education dropped almost 15 percent after adjustment for inflation (see table 1B and table A in appendix). This change reflects the effects of a substantial drop in on-budget program funds for education (19 percent) and an increase of almost 14 percent in the volume of nonfederal funds generated by federal programs. After 1983, total federal on-budget and nonfederal funds began to rise again, increasing 48 percent by 1993 after adjustment for inflation. This rise was due to increases for federal on-budget program funds for elementary and secondary education (52 percent), "other" education (37 percent), research at colleges and universities (51 percent), and an increase of almost 96 percent for nonfederal funds. Overall, federal on-budget funds for education are estimated to have increased 38 percent between FY 83 and FY 93 in constant dollars.

Nonfederal funds generated by federal programs showed an increase in real (constant) dollars between FY 80 and FY 93 (123 percent), but there were significant fluctuations throughout the period. These nonfederal amounts tend to fluctuate because of changes in interest rates and program legislation which affect the number and amount of student loans.

(See table A in appendix.)

Federal Program Support for Education, On-Budget

Federal education program funds are estimated to be $68.4 billion for FY 93 (see table C in appendix). In current dollars, this amount reflects an increase of 98 percent between FY 80 and FY 93. After adjustment for inflation, the increase is 13 percent between FY 80 and FY 93 (see table 2B and table A in appendix). Federal program funds generally have increased over the past 10 years, rising by 38 percent in constant dollars between 1983 and 1993, following a decline between 1980 and 1983 (see tables 2A, 2B, and table A in appendix). More than half of the increase occurred between 1990 and 1993.

Elementary and secondary education programs accounted for the largest share of federal program support, $31.5 billion or 46 percent in FY 93. Expenditures for elementary and secondary education programs increased 12 percent between FY 80 and FY 93 in constant dollars, but showed the same pattern of decreasing in the early 1980s and rising in the late 1980s as did federal education funding overall.

Postsecondary education programs received $17.0 billion of federal program support, or about 25 percent of federal education funds in FY 93. In constant dollars, postsecondary education programs showed a decline between 1980 and 1993 (13 percent). The main reason for this decline was the termination of two programs. The first program, the old GI Bill in the U.S. Department of Veterans Affairs, was limited to individuals in active military service before 1977. In FY 80, $1.6 billion was spent, but in FY 93 no funds were spent. The second program, Social Security postsecondary benefits programs in the U.S. Department of Health and Human Services, was phased out in August 1985. In FY 80, $1.6 billion was spent (see table C in appendix).

Federal support for research conducted at universities and at university-administered research and development centers accounted for $15.6 billion, or 23 percent of the total share of on-budget funds for FY 93. Federal support for research showed an increase in constant dollars of 53 percent between FY 80 and FY 93.

The remaining 6 percent of federal program support, or about $4.3 billion, is for "other" education programs, which include libraries, museums, cultural activities, and miscellaneous research. "Other" education programs increased 58 percent from FY 80 to FY 93, after adjustment for inflation. The "other" education programs fluctuated in the early 1980s, but have risen since 1985 (see figure 2).

SOURCE: U.S. Department of Education, National Center for Education Statistics, compiled from data appearing in U.S. Office of Management and Budget, *Budget of the United States Government,* fiscal years 1982 to 1994; National Science Foundation, *Federal Funds for Research and Development,* fiscal years 1980 to 1993; and unpublished data obtained from various federal agencies. (See table A in appendix.)

Among federal agencies, the Department of Education (ED) is the largest provider of education funds at all program levels except for research. ED's estimated FY 93 program funds were $30.7 billion—45 percent of the total (see table 3 and tables B and C in appendix). In terms of spending for research at universities, the Department of Health and Human Services (HHS) provides the most—$6.3 billion, or 41 percent of the total spent on research.

While total federal program funds for education and related activities have increased almost 13 percent in constant dollars between FY 80 and FY 93, education spending changes varied greatly among federal departments and agencies (see table 3 and tables B and C in appendix). For example, education spending by the Department of Veterans Affairs declined from $4.1 billion to $1.2 billion (71 percent) between FY 80 and FY 93, after adjustment for inflation. The reason for the decline is the termination of the Department of Veterans Affairs' largest education program, the old GI Bill (Montgomery Bill), limited to individuals in active military service before 1977. However, the new GI Bill, which was enacted in October 1984, established two new peacetime educational programs, which increased 172 percent in constant dollars between FY 90 and FY 93. In contrast, National Aeronautics and Space Administration (NASA) education spending increased from $0.4 billion to $1.4 billion, an increase of 218 percent between FY 80 and FY 93 (see table 3). NASA education spending has shown a large increase because of more federal spending on research (see table C in appendix).

Of the 10 largest providers of federal education program funding, seven had an increase in federal spending, after adjusting for inflation, between FY 80 and FY 93. Only the Department of Veterans Affairs and the Department of the Interior showed a decrease. The agencies that showed the largest percentage increases in constant dollars were the NASA (218 percent), National Science Foundation (54 percent), Department of Defense (45 percent), and Department of Education (33 percent).

Elementary and Secondary Programs

Almost 44 percent of the $31.5 billion spent by the federal government in FY 93 on elementary and secondary education came from the Department of Education (ED) (see table C in appendix). Some of ED's major programs in elementary and secondary education are: Chapter 1, Grants to Local Educational Agencies to improve education for the disadvantaged (the largest single federally funded elementary and secondary education program); Education for the Individuals with Disabilities; Chapter 2, School Improvement Programs; Vocational and Adult Education; and Impact Aid. The Department of Agriculture, the second largest provider for elementary and secondary education activities, funds the child nutrition programs. Among other federal agencies with substantial outlays in elementary and secondary education is the Department of Health and Human Services (HHS), which funds the Head Start program for children who are disadvantaged and also provides support to students under 19 who are covered by Social Security Benefit programs. HHS also funds the Aid for Dependent Children (AFDC) work programs created by the Family Support Act of 1988, which provides funds for the Job Opportunities and Basic Skills training programs for parents with dependent children on AFDC. The Department of Labor provides for classroom training and other programs through the Job Training Partnership Act, including the Job Corps program. These programs provide basic literacy and vocational skills training for educationally and economically disadvantaged youths. The Department of Defense (DOD) operates a large number of schools for children whose parents are U.S. military personnel stationed overseas or at certain installations in the United States. The Overseas Dependents Schools program is DOD's largest elementary and secondary program. The Department of the Interior provides funds for education and welfare services for American Indians through programs in the Bureau of Indian Affairs. The Department of Veterans Affairs funds vocational and job training programs for disabled service members and veterans.

Postsecondary Programs, On-Budget

Among federal agencies, the Department of Education is the primary provider of funds for postsecondary education (excluding research), spending $13.8 billion, or 81 percent of the $17.0 billion of federal support for postsecondary education in FY 93. The largest federal programs in postsecondary education are ED's Student Financial Assistance (SFA) programs and the Federal Family Education Loan (FFEL), formerly the Guaranteed Student Loan (GSL) program. The on-budget funding of the FFEL program primarily includes special allowances to the lender, in-school subsidized interest payments, and payments for loan defaults. The SFA and FFEL funds made available through nonfederal organizations as a result of these programs are included under nonfederal support. The second largest provider, the Department of Veterans Affairs, funds programs under the New GI Bill (Montgomery Bill) for veterans and members of the Selected Reserve. The Department of Health and Human Services, the third largest provider, supports college education through its Health Training programs and National Institutes of Health training grants. The Department of Defense, the fourth largest provider of funds for postsecondary education, provides funds for tuition assistance for military personnel, operation of service academies, the Senior Reserve Officer Training Corps, and professional development for officers.

Other Education Programs

"Other" education programs provide funds for special institutions, libraries, professional development at specific institutes, and a variety of cultural activities conducted in this country and abroad and some miscellaneous research. In FY 93, almost two-thirds of these funds came from the Department of Education and over 9 percent came from the Department of Agriculture. The largest "other" education program in FY 93 was the Rehabilitation Services and Disability Research programs funded through the Department of Education. The Library of Congress, Agency for International Development, Department of Health and Human Services, National Archives and Records Administration, and the National Endowment for the Humanities also made substantial outlays for "other" education-related programs.

Research

The Department of Health and Human Services (HHS) funds large amounts of research at universities and university-sponsored research and development centers. HHS expended $6.3 billion in FY 93, exceeding the research funding of any other federal department.

The Department of Energy ($2.8 billion) and the Department of Defense ($2.1 billion) also provide large amounts of funding for research at universities and related institutions. The National Science Foundation ($2.0 billion) and the National Aeronautics and Space Administration ($1.4 billion) are the only other agencies with estimated expenditures for university research exceeding $1 billion in FY 93. The Department of Education provided only $242 million in FY 93 (see table 4 and table C in appendix).

Nonfederal Funds Generated by Federal Legislation

Federal support for education extends beyond those amounts included in the U.S. Budget. To measure the impact of the federal role in supporting education, one must also take into account nonfederal funds that are made available for education purposes when federal programs require matching funds or offer incentives and subsidies. Even though nonfederal funds are excluded from the federal budget, a contingent federal financial responsibility exists for most of this support in the form of federal guarantees and subsidies for student loans made by banks and public and private lending authorities. This responsibility may result in additional federal spending which has to be financed by taxes, borrowing, or other means. Almost all education-related, nonfederal funding occurs in the area of loans for postsecondary students.

Nonfederal funds in this report have both nonfederal and on-budget funding components. The Federal Family Education Loan (FFEL) program subsidizes and guarantees low-interest loans to students, and guarantees higher-interest, less subsidized loans to parents and students. The on-budget components include the interest paid to the lender while the borrower is in school, and if required, a special allowance paid to lenders. If the borrower defaults on the loan, there is another on-budget component. This is the amount of the loan for which the lender must be reimbursed. The nonfederal funds component is the capital provided by private lenders for student loans.

The Perkins Loan program (formerly the Direct/Defense Loans), initially authorized under the National Defense Education Act of 1958, currently has some 3,300 participating institutions that administer the Perkins Loan revolving funds. These revolving funds have been built up through 30 years of federal capital contributions, with institutions providing one dollar for every nine federal dollars. In 1992, amendments changed the institutional match to 50 percent for low-default schools participating in the expanded lending option; 25 percent for all others. The Income Contingent Loan (ICL) program, created by the Higher Education Amendments of 1986, was a demonstration project that had a 10-institution limit on participation. These 10 institutions were required to match federal capital contributions at the rate of one institutional dollar for every nine federal dollars. On July 1, 1992 the ICL program was repealed by the Higher Education Act Amendments and the remaining funds were transferred to the Perkins Loan, College Work Study, and the Supplemental Educational Opportunity Grant program. The ICL repayment became a standard feature in student loans in the 1993 Student Loan Reform Act. Both the Perkins Loan and the ICL have revolving loan funds, for making new loans, and for collecting loans that the institutions are responsible for administering. The federal capital contributions to the Perkins Loan and the ICL programs are the on-budget funds and the institutions' capital contributions are the nonfederal funds.

The State Student Incentive Grant (SSIG) program provides incentives to states to develop state-level, need-based postsecondary student grant and community service work-study programs. Federal funds are matched by state contributions on a dollar-for-dollar basis, although some states choose to overmatch. Under the Work-Study Program, the Department of Education makes grants to participating institutions that use these funds for the salaries of undergraduate and graduate students working part-time, typically in on-campus jobs. In 1992, the institutional-matching share was 30 percent. In 1993, the institutional-matching share was 25 percent. Institutions may use work-study funds for the Community Service-Learning program, which provides community service jobs that serve low-income individuals.

The Supplemental Educational Opportunity Grant (SEOG) program is "campus-based" like the Work-Study program in that they both are administered primarily by the participating institutions using yearly allocations of federal funds. The SEOG program provides grant assistance to undergraduate students who demonstrate need under a statutory need-analysis system. Beginning in 1993, the federal share of such grants may not exceed 75 percent of the total grant.

Some $19.0 billion in nonfederal funds that are generated by federal education programs but do not appear as budget authority or outlays in the U.S. Budget assisted postsecondary students and institutions of higher education in FY 93. The nonfederal funds constituted 22 percent of the total federal support for education. Nonfederal funds associated with postsecondary education, combined with on-budget postsecondary education programs and research, amounted to $51.6 billion in FY 93, or about 59 percent of the total federal support for education (see tables 5A, 5B, and table A in appendix).

Under the FFEL program, new student loans totaling $18.0 billion were made in FY 93. The Perkins Loans program accounted for an additional $.02 billion in funds for low-cost loans to financially needy students. In FY 93, it is estimated that the SSIG program aided students with $0.6 billion in state-appropriated SSIG expenditures used to match federal funds. New reporting requirements for SSIG became effective in the 1990-91 academic year.

Previously, states were asked to show only the federal funds they received and the number of recipients served by those federal funds. Now, states are required to report the amount of federal SSIG funds, state-appropriated SSIG funds, and the total number of recipients served by both federal and state-appropriated SSIG funds. The nonfederal share of SEOG program amounted to $0.2 billion and under the Work-Study program, employer contributions to student earnings amounted to $0.2 billion.

Estimated Federal Tax Expenditures To Support Education

Federal support for education also comes indirectly through the U.S. tax code. For example, deductions allowed for state and local taxes—major sources of local education funding—on federal income tax returns reduce federal revenues and are known as federal tax expenditures. At the same time, tax expenditures reduce the burden of school support on individual taxpayers, mainly taxpayers who itemize. Some of these federal education tax expenditures are deductions of charitable contributions to educational institutions; exclusions of scholarships, fellowships, and GI Bill benefits from taxable income; personal exemption status on parents' federal income taxes for dependent students over 19 years of age; and exemption from federal taxes of interest income from state and local school bonds and student loan bonds.

Altogether, federal tax expenditures on education were estimated at $20.1 billion in FY 90, reflecting a decrease of 14 percent since 1980, after adjusting for inflation. Although there were fluctuations from year to year during this period, there was a significant drop in FY 88 (see table A in appendix). The Tax Reform Act of 1986 may have curtailed tax subsidies in several ways. First, it eliminated or restricted certain deductions and exemptions. Second, increases in the standard deduction may have turned many former itemizers into nonitemizers, reducing the subsidy value of such items as the deductibility of local school property taxes. And third, marginal tax rates have been reduced, shifting taxpayers into lower brackets and lowering the value of all remaining deductions, exclusions, and exemptions.

The reason for referring to these subsidies as "tax expenditures" is that the benefits provided by the federal government through tax preferences are equivalent to benefits that could be provided in the form of direct federal outlays for education. Consequently, federal tax subsidies should be taken into account when providing a comprehensive assessment of federal financial support for education.

Table 6.—Estimated federal tax expenditures for education: Fiscal years 1975 to 1990

[Amounts in billions of current and constant FY 93 dollars]

Estimated federal tax expenditures	FY 75	FY 80	FY 85	FY 89	FY 90	Percent change, FY 80 to FY 90	Percent change, FY 89 to FY 90

Recipients of Federal Education Support

Not all federal education support goes directly to schools, colleges, universities or other traditional educational institutions. Some goes directly to students (for school costs and for out-of-pocket expenses), some to banks (to pay interest subsidies and default costs on guaranteed loans), some for direct federal services (such as military academies or overseas dependents schools), and some for other institutions such as libraries or museums.

Recipients of federal education support are grouped in the following categories in this report: local educational agencies (LEAs), state education agencies (SEAs), students, institutions of higher education (IHEs), and the federal government (FED), which itself is a recipient of federal education funds when it spends directly for education and related activities. (See figure 3, and tables 7A, 7B, and tables D, E, and F in appendix). Also tabulated are "multiple" recipients, which are federal funds available to more than one type of eligible recipient, and "other" recipients, which include Indian tribes, private nonprofit agencies, and banks.

The initial recipient of federal education funds is frequently not the ultimate recipient of the funds. For example, SEAs apply for and receive federal aid that they pass on to their LEAs, while much federal student assistance is channeled through colleges to students who then spend it on tuition and books at the same IHEs.

Distribution of Federal Support for Education

Federal support to education amounted to $87.5 billion in FY 93. The IHEs received the largest share, followed by LEAs, students, other, multiple, SEAs, and the federal government (see tables 7A and 7B). Federal education funds increased 26 percent between FY 80 and FY 93, after adjustment for inflation, but there were significant differences among the recipient categories. Funds for LEAs fell by 2 percent after adjustment for inflation, in large part due to the discontinuation of the local revenue-sharing program in the Department of the Treasury. The drop in funds for students was affected by the decline in education benefits for veterans and discontinuation of Social Security benefits for postsecondary students (see tables 8A, 8B, and tables D and F in appendix). There was sizeable growth from FY 80 to FY 93 in programs for other, SEAs, and multiple recipients. The growth in SEAs and multiple recipients was in large measure due to increases in funding for handicapped students and the Head Start program. The amount funded for the "other" category rose by 88 percent between FY 80 and FY 93. Much of this funding went to financial institutions to support the Federal Family Education Loan program.

In FY 93 (see tables 8A and 8B), LEAs received most of the elementary and secondary education funds and about 22 percent of all federal education support (see table F in appendix). Students received the largest portion of support at the postsecondary education level and SEAs received the highest proportion at the "other" education level. IHEs received virtually all of the research funds. IHEs were also the largest recipient for total federal support (32 percent). Most of the nonfederal funds went to college students and IHEs.

In FY 93 (see table F in appendix), ED was the largest provider of funds for LEAs, SEAs, and "other" recipients. The largest provider for "students" was nonfederal funds generated by programs administered by the Department of Education (ED). The largest provider for IHEs was the Department of Health and Human Services; for the FED category, the Department of Defense; and for the Multiple category of recipients, the Department of Health and Human Services.

SOURCE: U.S. Department of Education, National Center for Education Statistics, compiled from data appearing in U.S. Office of Management and Budget, *Budget of the United States Government*, fiscal years 1982 to 1994; National Science Foundation, *Federal Funds for Research and Development*, fiscal years 1980 to 1993; unpublished data obtained from various federal agencies; and U.S. Department of Education, Office of Management and Budget, unpublished data.

Federal Support for Education Institutions

Total expenditures by public and private elementary and secondary schools and institutions of higher education from all sources (federal, state, and local governments, and private) rose from $165.6 billion in FY 80 to an estimated $466.1 billion in FY 93,[6] an increase of 60 percent after adjusting for inflation (see table 9B). Federal education support going to these institutions, including nonfederal funds and support for research, increased from $41.5 billion to $51.1 billion,[7] or by about 23 percent after adjustment for inflation.

Federal education support going to elementary and secondary institutions Local Education Agencies (LEAs) and State Education Agencies (SEAs) increased 8 percent (in constant dollars) between FY 80 and FY 93 and total federal support to institutions of higher education (IHEs) increased 40 percent (in constant dollars) during the same time. Because of the rise in expenditures of educational institutions, the proportion of funding from federal sources declined from 14 percent in FY 80 to 11 percent in FY 93. Between FY 90 and FY 93, however, the share of federal support increased slightly.

The Department of Education (ED) was the largest source of federal support for LEAs and SEAs. SEAs received 73 percent of their federal education aid from ED, while LEAs received 58 percent in FY 93. Most of the remaining federal support for LEAs came from the Department of Agriculture's Child Nutrition Program (39 percent) (see table F in appendix).

Estimated institutional expenditures for IHEs increased 70 percent between FY 80 and FY 93, after adjustment for inflation. During this period, federal on-budget support for IHEs increased 25 percent and nonfederal funds for IHEs increased 124 percent. Because of the rise in expenditures of higher education institutions, the share of funding from the federal government dipped from 18 percent in FY 80 to 15 percent in FY 93.

The Department of Health and Human Services, nonfederal funds generated by federal programs, and the Department of Education were the largest providers of federal program support for IHEs, accounting for 24 percent, 23 percent, and 19 percent respectively, of the FY 93 total. Other major sources of federal support for IHEs were the Department of Energy, 10 percent; Department of Defense, 8 percent; and the National Science Foundation, 7 percent. Of all types of recipients, IHEs received their federal funds from the largest number of different departments and agencies, minimizing their dependence on any one.

It is important to note that all federal support for higher education students does not go to institutions. For example, many college students receiving student aid use part of that aid to pay for off-campus housing. This is important to note when looking at tables 9A and 9B. Tables 9A and 9B undercount federal support. That is because these tables include only, the federal support passed through local educational agencies, state education agencies, and institutions of higher education (see tables D, E, and F in appendix). These tables also do not include the funds in the "federal" category that represents institutional expenditures such as Bureau of Indian Affairs schools or the service schools.

[6] U.S. Department of Education, National Center for Education Statistics, *Digest of Education Statistics, 1993*.

[7] These federal amounts differ from those reported in other NCES reports from the Common Core of Data and Financial Statistics of Institutions of Higher Education surveys. For further discussion, see Sources and Methodology section, pages 25 and 26.

[1] Excludes estimated federal tax expenditures.
[2] Estimated.
[3] Nonfederal funds generated by federal legislation.
[4] Includes all LEA and SEA revenues. See table 8B.

NOTE: This table includes only the federal support passed through local educational agencies, state education agencies, elementary and secondary institutions, and postsecondary institutions. Federal contributions to education through tax expenditures are not included in this table. Such payments would add substantial amounts and several percentage points to the federal share. Percentages are based on unrounded numbers. Data for institutional expenditures are for the academic year ending in the fiscal year indicated. Data for institutional expenditures and federal funds are adjusted by the federal funds composite deflator. Percentages based on unrounded numbers. Because of rounding, details may not add to totals. (See Sources and Methodology, page 23.)

SOURCE: U.S. Department of Education, National Center for Education Statistics, derived from Common Core of Data and Financial Statistics of Institutions of Higher Education surveys; and compilations from data appearing in U.S. Office of Management and Budget, *Budget of the United States Government*, fiscal years 1982 to 1994; National Science Foundation, *Federal Funds for Research and Development*, fiscal years 1980 to 1993; unpublished data obtained from various federal agencies; and U.S. Department of Education, Office of Management and Budget, unpublished data (see tables D, E, and F in current dollars in appendix).

Sources and Methodology

Data on expenditures for U.S. Department of Education programs came from the U.S. Office of Management and Budget, *Budget of the United States Government*, FY 1967 to 1994 editions. Budget offices of other federal agencies provided information for all other federal program support except for research funds, which are obligations reported by the National Science Foundation in *Federal Funds for Research and Development*, fiscal years 1965 to 1993. All FY 93 data, including the Department of Education's, were estimated. The estimates are from the federal agencies contacted and the *Budget of the United States Government, Fiscal Year 1994*.

Except for money spent on research, outlays were used to report program funds to the extent possible. (ED totals exclude deductions for offsetting receipts.) Some federal program funds not commonly recognized as education assistance are also included in the totals reported. For example, portions of federal funds paid to some states and counties as shared revenues resulting from the sale of timber and minerals from public lands have been estimated as funds used for education purposes by the U.S. Department of Agriculture and the U.S. Department of the Interior. Parts of the funds received by states (in 1980) and localities under the General Revenue Sharing Program are also included. The share of these funds allocated to education was assumed equal to the share of general fund expenditures for elementary and secondary education by states and localities in the same year as reported by the U.S. Bureau of the Census in its annual publication, *Governmental Finances*. Portions of federal funds received by the District of Columbia are also included. The share of federal funds for the District of Columbia assigned to education was assumed equal to the share of the city's general fund expenditures for each level of education.

All state intergovernmental expenditures for education were assumed earmarked for elementary/secondary education. Contributions of parent governments of dependent school systems to their public schools amounted to approximately 9 percent of local government revenues and local government revenue sharing in each year. Therefore, 9 percent of local government revenue sharing funds were assumed allocated each fiscal year to elementary and secondary education. Parent government contributions to public school systems were obtained from the U.S. Bureau of the Census, *Finances of Public School Systems*. The amount of state revenue sharing funds allocated for postsecondary education in 1980 was assumed to be 13 percent, the proportion of direct state expenditures for institutions of higher education reported in *Governmental Finances* for that year.

For the job training programs conducted by the Department of Labor, only estimated sums spent on classroom training have been reported as educational program support.

In the past, the Office of Management and Budget (OMB) prepared annual reports on federal education program support. These were published in *Special Analyses, Budget of the United States Government*. The information presented in this report is not, however, a continuation of the OMB series. A number of differences in the two series should be noted. OMB required all federal agencies to report outlays for education-related programs using a standardized form, thereby assuring agency compliance in reporting. The scope of education programs reported here differs from OMB. Nonfederal funds such as the annual volume of guaranteed student loans were not included in OMB's reports. Finally, while some mention was made of an annual estimate of federal tax expenditures, OMB did not include them in its annual analysis of federal education support. Estimated federal tax expenditures for education are the difference between current federal tax receipts and what these receipts would be without existing education deductions to income allowed by federal tax provisions. Federal tax expenditures data are from reports prepared under contract ("Federal Tax Expenditures, FY 1980 to FY 1984;" "Federal Tax Expenditures, FY 1984 to FY 1988;" and "Federal Tax Expenditures, FY 1975 to FY 1990") for the National Center for Education Statistics, U.S. Department of Education.

The method for estimating recipients' data is based on Victor Miller and Jay Noell's *Estimating Federal Funds for Education: A New Approach Applied to Fiscal Year 1980* and Esther Tron's "Federal Support for Education, Fiscal Years 1980 to 1984" (U.S. Department of Education); and the Office of Management and Budget's *Catalog of Federal Domestic Assistance*. The recipients' data are estimated based on obligations. These estimates tend to undercount IHEs, students, and LEAs because some federal programs have more than one recipient receiving funds. Some recipients may not even realize that the funds they received are federal in origin if they are received indirectly, through a third party. Many do not know the name of the federal department making the payment, especially when one federal agency makes a payment for another agency or when funds flow through intervening state institutions. In some cases the recipients were put into a "multiple recipients" category, because

there was no way to disaggregate the amount each recipient received. Thus, distributing federal aid by ultimate recipient must still be indirectly estimated.

Funding totals in NCES reports differ from those in the National Education Goals Panel reports. NCES reports all federal funds in support of education or of educational institutions. This report is an extension of a data series first constructed by the Office of Management and Budget in 1967 and transferred in the early 1980s to NCES. It is not limited to education spending for Goals-related activities.

Data in the Goals Panel's reports represent a compilation of federal funds in support of the National Education Goals. They are not limited to educational services or to assistance for educational institutions but include certain health, welfare and security expenditures. The Goals reports also generally use "budget authority" data rather than outlays that are generally used in the *Federal Support for Education* report. Since expenditures usually lag behind the commitment (i.e., use of budget authority) of government funds, in a period of rising expenditures using budget authority rather than outlays for a program would result in higher expenditure figures.

Federal support for education institutions differs in this report from those reported in other National Center for Education Statistics reports from the Common Core of Data (CCD) and Financial Statistics of Institutions of Higher Education surveys. An example would be in FY 1980 where the CCD survey reports $9.5 billion for elementary and secondary institutions, whereas this report has $12.3 billion (in current dollars). The Financial Statistics of Institutions of Higher Education survey reported $8.9 billion for FY 1980, whereas this report has $11.2 billion. There are many reasons for the differences. The institutional surveys count federal revenues received during the fiscal year of the educational institution (often July 1 to June 30) which do not generally correspond exactly to those received during the federal fiscal year (October 1 to September 30). State education agencies are not included in the CCD and the Financial Statistics of Institutions of Higher Education surveys; however, they are included in this report. Some federal programs are forward funded: funds are appropriated in one fiscal year for spending by educational institutions in following years. In some cases, institutions do not identify federal money passed through state governments as "federal" receipts. At the elementary and secondary education level, private elementary and secondary schools and state government-operated institutions such as those for the individuals with disabilities are not included in the CCD survey prior to 1989. Some types of federal financial aid programs, such as FFEL and NDSL, are specifically excluded from the Financial Statistics of Institutions of Higher Education survey. Nonfederal support is also excluded. Data on federal support appearing in this report are more comprehensive in scope than totals from institutionally based surveys. For these reasons and a variety of other factors, federal support data in this report will differ from figures in NCES survey reports.

This report shows current and constant dollar comparisons. The federal funds composite deflator from the U.S. Office of Management and Budget (*Budget of the United States Government, Fiscal Year 1994*) was used to compute constant dollars. The composite deflator numbers are:

Fiscal year	Composite deflator
1965	0.2641
1970	0.3273
1975	0.4758
1980	0.7102
1981	0.7817
1982	0.8369
1983	0.8776
1984	0.9125
1985	0.9452
1986	0.9735
1987	1.0000
1988	1.0361
1989	1.0815
1990	1.1284
1991	1.1782
1992	1.2147
1993	1.2498

Definitions

Appropriations—budget authority provided through the Congressional budget process that permits federal agencies to incur obligations and to make payments.

Constant dollars—sometimes called real dollars, are dollar amounts that have been adjusted by means of price indexes to eliminate inflationary factors and allow direct comparison across years.

Current dollars—dollar amounts that have not been adjusted for inflation.

Federal funds—are the on-budget funds.

Federal funds composite deflator—price index used by the U.S. Office of Management and Budget to adjust federal budget data to compensate for the effects of inflation.

Federal suppport—are the on-budget and nonfederal funds generated by federal programs. Excludes federal tax expenditures.

Fiscal year (FY)—the yearly accounting period for the federal government, which begins on October 1 and ends on the following September 30. The fiscal year is designated by the calendar year in which it ends; for example, fiscal year 1988 begins on October 1, 1987, and ends on September 30, 1988. [NOTE: Prior to fiscal year 1976, the fiscal year began on July 1 and ended on the following June 30.]

Nonfederal funds—funds that are generated by federal legislation that are not included in the federal budget because they are classified as being private enterprises, even though funding is generated by federal legislation that provides loan guarantees and interest subsidies to support loan capital raised through private sources and institutions of higher education. Although nonfederal funds are excluded from the federal budget, a contingent federal financial responsibility exists for most of these funds in the form of federal guarantees and subsidies for student loans made by banks and public lending institutions. Nonfederal funds are also funds that are made available for education purposes when federal programs require matching funds or offer incentives and subsidies.

Obligations—are binding agreements that will result in outlays, immediately or in the future. Budgetary resources must be available before obligations can be incurred legally.

On-budget funds—funds that are provided through programs funded by Congressional appropriations. Nonfederal funds are not included in the on-budget funds.

Outlays—are the measure of government spending. They are payments to liquidate obligations (other than the repayment of debt), net of refunds and offsetting collections. Outlays are generally recorded on a cash basis, but also include many cash-equivalent transactions, the subsidy cost of direct loans and loan guarantees, and interest accrued on public issues of the public debt.

Revenues—money collected by the government as duties, taxes, or as premiums from social insurance programs. Revenues are all funds received from external sources, net of refunds, and correcting transactions. Non-cash transactions such as receipt of services, commodities, or other receipts "in kind" are excluded as are funds received from the issuance of debt, liquidation of investments, and nonroutine sale of property.

Tax expenditures—are revenues foregone by the federal government through allowable income tax deductions. They are reductions of tax revenue attributable to provisions of the federal income tax laws that allow a special exclusion, exemption, or deduction from gross income or provide a special credit, preferential rate of tax, or a deferral of tax liability affecting individual or corporate income tax liabilities.

[1] On-budget support includes federal funds for education programs tied to appropriations.

[2] New student loans guaranteed by the federal government and disbursed to borrowers.

[3] Student loans created from institutional matching funds (1/9 of the federal contribution). Excludes repayments of outstanding loans.

[4] Student loans created from institutional matching funds (1/9 of the federal contribution). This is a demonstration project which involves only 10 institutions and has unsubsidized interest rates.

[5] Reporting method changed in fiscal year 1990 so data are not comparable to prior years.

[6] Institutions award grants to undergraduate students, and the federal share of such grants may not exceed 85 percent of the total grant.

[7] Employer contributions to student earnings.

[8] Tax expenditures are the difference between current federal tax receipts and what these receipts would be without existing education deductions to income allowed by federal tax provisions.

[9] Estimates based on most recent available program data. Reflects the program statutory dollar for dollar state matching as well as any overmatch of federal funds by states.

[10] Total excludes Indiana because its application had not been finalized.

[11] Estimated.

[12] Data adjusted by the federal funds composite deflator prepared by the Office of Management and Budget.

—Not available or not applicable.

NOTE.—To the extent possible, federal education funds data represent outlays rather than obligations. Because of rounding, details may not add to totals. Data have been revised from previously published figures.

[1] Estimated.

[2] The U.S. Department of Education was created in May 1980. It formerly was the Office of Education in the U.S. Department of Health, Education, and Welfare.

[3] America 2000 is included in FYs 92 and 93.

[4] These commodities are purchased under Section 32 of the Act of August 24, 1935, for use in the child nutrition programs.

[5] This program assisted in the construction of public facilities, such as vocational schools, through grants or loans. No funds have been appropriated for this account since FY 77, and it was completely phased out in FY 84 after the monitoring of closeouts of projects was completed. Data are not available for previous years.

[6] This program was funded by the Department of Education in FYs 65 through 81 in the "Impact Aid" program. This program provides for education of dependents of federal employees residing on federal property in cases where free public education is unavailable in the nearby community.

[7] The U.S. Department of Energy was created in 1977. It formerly was the Energy Research and Development Administration and before that the Atomic Energy Commission.

[8] This program was established in 1979. Funds were appropriated for this program in FY 80.

[9] The U.S. Department of Health and Human Services was part of the U.S. Department of Health, Education, and Welfare until May 1980.

[10] The Head Start program was formerly in the Office of Economic Opportunity, and funds were appropriated to the U.S. Department of Health, Education, and Welfare, Office of Child Development, beginning in 1972.

[11] This program was created by the Family Support Act of 1988. It provides funds for the Job Opportunities and Basic Skills Training Program.

[12] After age 18, benefits terminate at the end of the school term or in 3 months, whichever is less.

[13] This program provides funding for supplemental programs for eligible Indian students in public schools.

[14] This program finances the cost of academic, social, and occupational education courses for inmates in federal prisons.

[15] The Job Corps program was formerly in the Office of Economic Opportunity, and funds were appropriated to the U.S. Department of Labor beginning in 1971 and 1972.

[16] Some of the work and training programs included in this program were in the Office of Economic Opportunity and were transferred to the U.S. Department of Labor in 1971 and 1972.

[17] The U.S. Department of Transportation was created in 1967.

[18] This program was transferred from the U.S. Department of the Treasury to the U.S. Department of Transportation in 1967.

[19] This program was established in FY 72 and closed in FY 86.

[20] The states' share of revenue-sharing funds was not spent on education in FYs 81 through 86.

[21] The U.S. Department of Veterans Affairs, formerly the Veterans Administration, was created in March 1989.

[22] This program provides educational assistance allowances in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977. It includes "Readjustment Benefits," Chapter 34, for education other than college and also includes the Veterans Job Training Program for service persons and veterans. Chapter 34 program closed December 31, 1989. The Veterans Job Training Program was put in the postsecondary program Payments to State Education Agencies. Veterans who were still eligible to receive benefits under Chapter 34 were put in Chapter 30 (The All-Volunteer-Force Educational Assistance program).

[23] This program is in "Readjustment Benefits" program, Chapter 31, and covers the costs of subsistence, tuition, books, supplies, and equipment for disabled veterans requiring vocational rehabilitation.

[24] This program is in the "Readjustment Benefits" program, Chapter 35, and provides benefits to children and spouses of veterans.

[25] This agency was established March 9, 1965. First year of appropriations was 1966. The outlays were larger in the years 1970 and 1975 for elementary and secondary education because of the construction of facilities for vocational schools.

[26] This agency was established in 1965. In 1970, $900,000 was appropriated through the Office of Education, U.S. Department of Health, Education, and Welfare, for the National Endowment for the Arts, Arts in Education program.

[27] This agency was established in 1965. First year of appropriations was 1966.

[28] The Economic Opportunity Act of 1964 authorized 10 major action programs, including Job Corps, Neighborhood Youth Corps, Adult Literacy, Work Experience, College Work-Study, and Community Action programs, including Head Start, Follow Through, and Upward Bound, and authorized the establishment of Volunteers in Service to America (VISTA). These programs were transferred to the U.S. Department of Health, Education, and Welfare, U.S. Department of Labor, and the Action Agency in the 1970s. An act on January 4, 1975 established the Community Services Administration as the successor agency to the Office of Economic Opportunity.

[29] Head Start program funds were transferred to the U.S. Department of Health, Education, and Welfare, Office of Child Development, in 1972.

[30] Most of these programs were transferred to the U.S. Department of Health, Education, and Welfare, Office of Education, in 1972.

[31] The Job Corps programs were transferred to the U.S. Department of Labor in 1971 and 1972.

[32] These programs were transferred to the U.S. Department of Labor in 1971 and 1972.

[33] These programs were transferred to the Action Agency in 1972.

[34] Similar programs were included in the "higher education" program in 1965 through 1975.

[35] Negative amounts occur when program receipts exceed outlays.

[36] This program was transferred from the U.S. Department of Housing and Urban Development to the U.S. Department of Health, Education, and Welfare, Office of Education, in FY 79.

[37] First year of appropriations for this program was 1967.

[38] Program funds were first appropriated for Tuskegee Institute in 1972.

[39] The Sea Grant College Program Act of 1966 established a matching fund grant program that provides for the establishment of a network of programs in fields related to development and preservation of the nation's coastal and marine resources. One of the objectives is to provide trained personnel to utilize and manage these resources. This program was transferred from the National Science Foundation to the U.S. Department of Commerce, October 1970. Appropriations began in 1968.

[40] This program was transferred to the U.S. Department of Transportation in FY 81 by Public Law 97-31, from the U.S. Department of Commerce.

[41] The Department of Defense funds for FYs 89 to 92 are lower than previous years because they exclude military pay and reserve accounts which were included in previous years. FY 65 data are not available except for service academies.

[42] Included in total above.

BEST COPY AVAILABLE

[41] Instructional costs only are included. These include academics, audiovisual, academic computing center, faculty training, military training, physical education, and libraries.

[42] Includes special education programs (military and civilian); legal education program; flight training; advanced degree program; college degree program (officers); and "Armed Forces Health Professions Scholarship" program.

[43] No funds have been appropriated for this program since FY 82.

[44] This program receives funds periodically.

[45] Appropriations began in FY 84.

[46] Appropriations began in FY 89.

[47] Does not include higher education assistance loans.

[48] Appropriations began in FY 78.

[49] Alcohol, drug abuse, and mental health training programs are included starting in FY 1992.

[50] Beginning in FY 1992 data were included in the National Institute of Health training grants program.

[51] Postsecondary student benefits were ended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35) and were completely phased out by August 1985.

[52] Includes adult education, tribally controlled community colleges, other postsecondary schools, and in FY 91 also includes indirect administrative cost grants.

[53] This program was transferred from the Department of State to the International Communication Agency (I.C.A.) in the Reorganization Plan No. 2 of 1977, which consolidated the functions of the United States Information Agency (U.S.I.A.) and the Department of State's Bureau of Educational and Cultural Affairs. In FY 82 the I.C.A. became the U.S.I.A.

[54] This program provides funds for advanced study and research projects of the Soviet Union and Eastern European countries by American institutions of higher education and private research firms. Appropriations began in FY 88.

[55] This program was transferred to the U.S. Department of Transportation in FY 81 by Public Law 97-31, from the U.S. Department of Commerce. FY 89 outlays are high because of the replacement of one of the training ships.

[56] Includes flight training. This program was in the U.S. Department of the Treasury in 1965 and was transferred to the U.S. Department of Transportation in 1967.

[57] Includes Vietnam-era veterans under Chapter 34 (GI Bill) of the "Readjustment Benefits" education and training program. This program provides educational assistance allowances, primarily on a monthly basis, in order to restore lost educational opportunities to those individuals whose careers were interrupted or impeded by reason of active military service between January 31, 1955, and January 1, 1977. This program closed December 31, 1989. Some veterans who were still eligible were put in Chapter 30 (the All-Volunteer-Force Educational Assistance program).

[58] Includes service persons under Chapter 34 (GI Bill) of the "Readjustment Benefits" education and training program. Service persons with over 180 days of active duty, any part of which was before January 1, 1977, are eligible to participate in this program.

[59] Includes post-Vietnam-era veterans, under Chapter 32, of the post-Vietnam-era "Veterans Education Account." Provides education and training assistance payments to veterans and service persons with no active duty time before January 1, 1977. Funding is provided through participants' contributions while on active duty and through transfers from the U.S. Department of Defense (DOD). Participants' contributions, up to a maximum of $2,700, are deposited to the fund prior to discharge. When the participant enters training, the monthly disbursement from his or her account is matched two for one from funds provided by DOD. Additional amounts in the form of incentive bonuses may also be provided by DOD funds. The U.S. Department of Veterans Affairs funds are not appropriated for this program, so these data represent obligations.

[60] Public Law 98-525, enacted October 19, 1984 (New GI Bill), established two new peacetime educational programs: an assistance program for veterans who enter active duty during the period beginning July 1, 1985, and ending on June 30, 1988, and an assistance program for certain members of the Selected Reserve.

[61] Chapter 30, also called the Montgomery Bill, and the new GI Bill are for eligible veterans who have agreed to have their military pay reduced $100 per month for their first 12 months of active duty in order to participate in this program. The "Readjustment Benefits" account under the U.S. Department of Veterans Affairs pays only the basic allowance, up to a maximum of $300 per month, for full-time training. "Supplemental Benefits" are paid by the U.S. Department of Defense (DOD).

[62] Chapter 106 is for members of the Selected Reserve. The reserve components include the Army, Navy, Air Force, Marine Corps Reserve, Army National Guard and Air National Guard under the U.S. Department of Defense (DOD), and the Coast Guard Reserve, which is under the U.S. Department of Transportation (DOT), when it is not operating as a service in the Navy. Eligible persons can receive up to $140 per month for full-time training. The DOD and DOT pay for this program, and the U.S. Department of Veterans Affairs administers it.

[63] Includes dependents of veterans under Chapter 35, the "Readjustment Benefits" education and training program. Provides education and training benefits to dependents of veterans who died of a service-connected disability or whose service-connected disability is rated permanent and total.

[64] These payments have been made to State education agencies for years but they were not available as a separate budget item until FY 88.

[65] The U.S.I.A. was called the "International Communication Agency" in FYs 80 and 81.

[66] This program was in the "Educational and Cultural Affairs" program in FYs 80 through 83, and became an independent program in FY 84.

[67] This program was combined with the "educational and cultural affairs" program in FY 77.

[68] Public Law 99-661 established this program to operate the scholarship program in tribute to the former Senator from Arizona. The Foundation awards scholarships and fellowships to outstanding graduate and undergraduate students who intend to pursue careers or advanced degrees in science or mathematics. The Foundation may also award honoraria to outstanding individuals who have made significant contributions to improve the instruction of science and mathematics in secondary schools.

[69] Appropriations for this program began in FY 76.

[70] Public Law 99-498 established this Institute as an independent non-profit corporation administered by a Board of Trustees. The Institute provides Native Americans with an opportunity to obtain a postsecondary education in various fields of Indian art and culture.

[71] Public Laws 99-500 and 99-591 established the James Madison Memorial Fellowship Foundation to operate a fellowship program to encourage graduate study of the American Constitution. First year of appropriations was FY 88.

[72] This program was transferred to the U.S. Department of Transportation in FY 68 from the U.S. Department of Housing and Urban Development.

[73] This program was established by the Juvenile Justice and Delinquency Prevention Act of 1974 to provide education and training and to provide leadership in improving correctional programs and practices in prisons. FY 75 had large outlays because of the construction of buildings and facilities.

[74] Appropriations for this program began in FY 70. This program is part of the Federal-Aid Highway Act of 1970, Public Law 91-605.

[75] The Federal Aviation Administration was an independent agency, and was transferred to the U.S. Department of Transportation in FY 67.

[76] Appropriations began in FY 72. No funds have been appropriated since FY 82.

[77] First year of appropriations was FY 70.

[78] This agency was established on July 1, 1971. This agency brings together a number of volunteer programs. Some of these funds were formerly in the Office of Economic Opportunity.

[79] These programs included the Service Learning Programs, University Year for Action, Volunteers in Service to America, Youth Challenge Program, and the National Student Volunteer Program in FY 1975. In FY 80 programs included were the University Year for Action, Young Volunteers for Action, and National Service Learning Programs. In fiscal year 1985, the program included was the Service Learning Programs, and in FYs 89 to 93, programs included were the Literacy Corps and the Student Community Services Program.

[80] The Federal Emergency Management Agency was created on March 25, 1979, representing a combination of about five existing agencies. The two largest were the Defense Civil Preparedness Agency in the U.S. Department of Defense and the Federal Preparedness Agency in the General Services Administration. The funds for the Federal Emergency Management Agency in FY 70 to FY 75 were in these other agencies.

[81] First year of appropriations was FY 68.

[82] First appropriations for the "other training programs" were in the late 1960s. These programs include the Fall-Out Shelter Analysis, Blast Protection Design, and Multi-Protection Design Summer Institute.

[83] This program was transferred from the General Services Administration to the National Archives and Records Administration in April 1985.

[84] This program makes grants for the promotion of scholarly, cultural, and artistic exchanges between Japan and the United States. Appropriations began in FY 76.

[85] The National Archives and Records Administration became an independent agency in April 1985.

[86] This program was established by the act of July 20, 1970, Public Law 91-345.

[87] This program was established by Congress to conduct and support research and scholarships in the fields of peace, arms control, and conflict resolution. This program began operation in February 1986.

[88] Includes Federal obligations for research and development centers administered by colleges and universities. FYs 92 and 93 are estimated.

[89] Total outlays for FYs 65 and 70 include the "Research and Training" program. FY 75 includes the "National Institute of Education" program. FYs 80 to 93 include outlays for the Office of Educational Research and Improvement.

—Not available or not applicable.

NOTE.—Some data have been revised from previously published figures. To the extent possible, amounts reported represent outlays rather than obligations. Negative amounts occur when program receipts exceed outlays.
